Professional Profile

Electronics and Communication Engineering student with strong foundations in Python, C, and C++, along with core knowledge in VLSI Design, Embedded Systems, and Telecommunication. Familiar with Data Structures, OOP, and Operating Systems. Interested in applying problem-solving and technical skills in core and software engineering roles.

Core Competencies

Technical Skills :
Languages - Python, C, C++
Core Subjects - Data Structures & Algorithms, Object-Oriented Programming, Operating Systems
Domain Knowledge - VLSI Design, Embedded Systems, Telecommunication
Soft Skills :
Analytical Thinking, Teamwork, Time management, Adaptability, Communication

Education

SRM Institute of Science and Technology, Ramapuram
B.Tech – Electronics and Communication Engineering
CGPA: 9.33 / 10

Professional Experience

BSNL — Telecom Internship
- Learned fundamentals of telecom network operations and infrastructure
- Gained exposure to signal processing and communication systems
- Observed real-world implementation of large-scale networks

Technical Projects

Hand Gesture Controlled Snake Game
- Developed a basic hand gesture recognition system using Python and computer vision concepts
- Processed video input and mapped gestures to control game movement
- Demonstrated understanding of real-time input processing

Smart Mobility Tank – Autonomous Navigation Vehicle
- Designed a simple autonomous vehicle using embedded system concepts
- Implemented obstacle detection using sensor-based logic
- Applied embedded programming for motor control and navigation

Certifications

Getting Started with Artificial Intelligence – **IBM**
Python Development and Programming Fundamentals – **Udemy**

Achievements

Participant – TECHN-A-THON National Level Hackathon
Active problem solving on LeetCode, CodeChef, Codeforces

Languages

English : Professional | Tamil : Native | German : Basic
